Sunset & Golden Hour

7:11 PM PDT

Estimated sunset for Golden Gate Bridge on September 19. Golden hour (soft, warm light best for photos) typically begins about 45–60 minutes before sunset — plan ceremony or portrait timing around **6:21 PM**.

What This Means For Your Day

FACTOR	OUTLOOK
Rain risk	Low. Measurable rain has occurred on only 6.2% of comparable dates in the historical record.
Temperature	Comfortable. Average high of 70.6°F falls squarely in the ideal outdoor-ceremony comfort range.
Humidity / mugginess	Low. A typical dewpoint of 55.3°F for this date means dry, comfortable air — not muggy.

What this report is (and isn't): These figures come from 30 years of actual recorded weather at the nearest quality climate station, pooled across a ±3-day window to build a stable sample (210 days). This is a climate outlook, not a forecast — it tells you what's typical and how much risk this date has historically carried, not what the weather will specifically do on September 19. As your date gets closer, get the real forecast update (see below).
